There an elliptic path four thousand millions are charges of "sell outs," "personal of miles in extent.

A DOUBLE WEDDING .- An event that is being looked forward too with happy anticipations by the large circle of friends of the parties most interested, is the double wedding to occur at the Methodist church Thursday evenng of next week, August 18, when will Bought at bottom wholesale rates and cash discounts, and occur the marriage of Miss Clara Parsons to Mr. John A. Miller, and the marriage of Miss Elva Ebling to Mr. N. E. Tower. With the exception of Teas, Coffees and Spices a Specialty, and only the best goods Mr. Tower, who resides in Union City, on the lakes.

> They are all of one mind as to general Camp Robertson. The discipline at the camp was better than ever before fervent faith in the precious promises and the drilling and practice were conducted in a more thorough, soldierly manner than at previous encampments. Our boys were made quite indignant by the report published in the Detroit papers that a member of the Ypsilanti Company had been sent home for drunkenness. The drunken militiaman was a member of some other company, boys behaved themselves admirably. Company H. has received an invitation probabilities are that the invitation teemed. will be accepted.

HIS PRIDE HUMBLED.-Two pickpockets were arrested at the race track last week, who gave their names as John Conners and Edward Webb, probably not their true names, and they are now in the jail at Ann Arbor. They Where we will be pleased to see all our old deceptive in his case, and the result who lived to womanhood and died pickpockets were captured. Their trial | young. was to have taken place this week, but for some reason was postponed. They will probably be discharged without ever being brought to trial. There is no reason why the pickpockets should not be prosecuted to the full extent of the law, and every reason why they should be, but we very much fear they will not be prosecuted at all.

THEY WERE SUCCESSFUL.-Through 4. Ladies or gentlemen, and how the failure of any horse entered in the many. trotting contest of the last afternoon of the meeting to win three heats, it was tlemen to occupy rooms in the same necessary to hold an adjourned session house will be observed. Direct through Litchfield, Mich. Mr. Slaussen was an are sojourning at Diamond Lake, where Saturday afternoon. The races were a the P.O. to success financially, we learn from the managers, and those who attended seemed to enjoy the racing, and as the Joe Manning is not, of course, but matters of finances and fun were about | the elegant confectionery he keeps at all that was involved in the meeting it his cigar store is the purest and best in L. Union services will be held at the Congregational church next Sunday evening The sermom will be given by Rev. J. L. Cheney.

At their meeting last evening, the A. O. U. W. of this city decided to hold a pienie, Thursday, August 25, in F. A. Graves' woods, about four miles south of the city. The program of the day will include short addresses and other forms of entertainment.

Mr. Durand Springer was twentyone years of age Tuesday, and the pleasure of the event was much increased to Durand by the presentation to him of a handsome gold-headed cane, from the teachers and pupils of Cleary's Business College, with which he is at present connected as instructor in bookkeeping.

Mr. Robert Wilder, the young advocate of increased missionary effort and zeal, did not address the prayer meeting at the Presbyterian church last Thursday evening, as was announced he would do, failing to reach the city before that time. Through the courtesy of Rev. Mr. Springer, Mr. Wilder was invited to take his place in addressing the union meeting at the Baptist church last Sunday evening. and the invitation was accepted. The address delivered by Mr. Wilder was a most excellent one, thoroughly convincing on all the points it touched. Mr. Wilder is not eloquent or flowing in Mr. and Mrs. Wm. Deubel and fam- speech, but he is earnest and enthusiastic and interesting. He was the guest of his uncle, Mr. J. Evarts Smith. Prof. Bellows goes to Monroe Satur- while here, and left for his home in the east Tuesday.

A buff seersucker coat, on Summit or Congress streets. The finder will please favor the owner by leaving the coat at the post office.

"Have a Cigar?" If you will, please remember that the

best place in the city to get it is at Joe Manning's cigar store. He keeps the best five cent cigars in Ypsilanti, and a full line of smoker's articles.

House For Sale.

Frame house, nine rooms, centrally located. Will be sold for \$1000, if sold before September 1. Call at McCullough's Machine Works.

DREAM POEMS.

LEE FAIRCHILD.

But my poems in dreams have been sweeter Than the songs I have heard when awake, And the rhythmicl flow of their meter Than the fall of the leaf or the flake.

They were idyls not born of the senses, And their beauty of form was sublime, And I verily do them offenses As I tempt them to enter my rhyme.

They were beautiful songs of fancies, And they floated away in a dream To the music whose sweetness entrances As the murmur and flow of the stream,

TALMAGE'S SERMON.

Text:-Now it came to pass in the thirtieth year, in the fourth month, in the fifth day of the month, as I was among the captives by the river of Chebar, that the heavens were opened. - Ezekiel i, 1.

Ezekiel, with others, had been expa-

triated, and while in foreign slavery was standing on the banks of the royal canal which he and other serfs had been condemned to dig by the order of Nebuchadnezzar-this royal canal, in the text called the river of Chebar; the illustrious exile had visions of heaven. Indeed, it is almost always so that the brightest visions of heaven come not to those who are on mountain top of prosperity, but to some John on desolate Patmos, or to some Paul in Mamertine dungeon, or to some Ezekiel standing on the banks of a ditch ne had been compelled to dig-yea, to the weary, to the heart-broken, to those

whom sorrow has banished. The text is very particular to give us the exact time of the vision. It was in the thirtieth year, and in the fourth month, and in the fifth day of the month. So you have had visions of earth you shall never forget. You remember the year, you remember the month, you remember the day, you remember the hour. Why may not we have some such vision this morning, and it be in the sixth month and in the

fourth day of the month? The question is often silently asked, though perhaps never audibly pro-pounded: "What are our departed Christian friends doing now?" The question is more easily answered than you might perhaps suppose. Though there has come no recent intelligence from the heavenly city, and we seem dependent upon the story of eighteen centuries ago, still I think we may from strongest inference decide what are the present occupations of our

transferred kinsfolk. After God has made a nature he never eradicates the chief characteristics of its temperament. You never knew a man phlegmatic in temperament to become sanguine in temperament. You never knew a man sanguine in temperament to become phlegmatic in temperament. Conversion plants new principles in the soul, but Paul and John are just as different from each other after conversion as they were different from each other before conversion. If conversion does not eradicate the prominent character-

death eradicate them. You have, then, only by a sum in subtraction and a sum in addition to decide what are the employments of your departed friends in the better world. You are to subtract from them all earthly grossness and add all earthly goodness, and then you are to come the conclusion that they are doing now in heaven what in their best moments they did on earth. The reason that so many people rever start for heaven is because they could not stand it if they got there, if it should turn out to be the rigid and formal place some people photograph it.

We like to come to church, but we would not want to stav here to next Christmas. We like to hear the Hallelujah Chorus, but we would not want to hear it all the time for fifty occasion it would be possibly comfortable to wear a crown of gold weighing several pounds, but it would be affliction to wear such a crown forever. In other words, we run the descriptions toriously difficult university at which of heaven into the ground, while we to pass an examination, but Fries took | make that which was intended as escial and celebrative to be the exclu sive employment of the heaven. You might as well, if asked to describe the habits of American society, describe a Decoration Day or a Fourth of July, or an autumnal Thanksgiving, as though it were all the time that way.

I am not going to speculate in regard to the future world; but I must, by inevitable laws of inference and deduction and common sense, conclude that in heaven we will be just as different from each other as we are now different, and hence, that there will be at least as many different employments in the celestial world as there are employments here. Christ is to be the great love, the great joy, the great rapture, the great worship of heaven; but will that abolish employment? No more than loves on earth --paternal, filial, fraternal, conjugal

love-abolish earthly occupation. In the first place, I remark that all those of our departed Christian friends who on earth found great joy in the fine arts are now indulging their tastes in the same direction. On earth they had their gladdest pleasures amid pictures and statuary, and in the study of the laws of light and shade and perspective. Have you any idea that that affluence of faculty at death collapsed and perished? Why so, when there is more for them to look at, and they have keener appreciation of the beautiful, and they stand amid the very looms where the sunsets and the rainbows and the spring mornings are woven?

I remark again, that all our departed Christian friends who in this world were passionately fond of music are still regaling that taste in the world celestial. The Bible says so much about the music of heaven that it cannot all be figurative. The Bible over and over again speaks of the songs of heaven. If heaven had no songs of its own a vast number of those of earth would have been taken up by the earthly emigrants. Surely the Christian at death does not lose his memory. Then there must be millions of souls in heaven who know "Coronation," and "Antioch," and "Mount Pisgah," and "Old Hundred." The leader of the eternal orchestra need

Again, I remark that those of our this congregation is composed of citi- departed Christian friends who in this world had very strong military spirit "I can't come now, maw," said the are now in armies celestial and out on high-school girl, when her mother bloodless battle. There are hundreds called her to assist in some household of people born soldiers. They can not help it. They belong to regiments in time of peace. They can not hear a drum or fife without trying to keep step to the music. They are Christians, and when they fight they fight on the right side. Now when these, our Christian friends who had natural

> But what are our mathematical friends to do in the next world? They

of mathematics as Plato, who wrote over his door: "Let no one enter here who is not acquainted with geometry.' What are they doing now? They are busy with figures yet. No place in all the universe like heaven for figures. Numbers infinite, distances infinite, calculations infinite. The didatic Dr. Dick said he really thought that the time with the higher branches of

mathematics. What are our departed Christian friends who are explorers doing now? Exploring yet, but with lightning locomotion, with vision microscopic and telescopic at the same time. A continent at a glance. A world in a second.

A planetary system in a day. What are our departed friends who found their chief joy in study doing now? Studying yet, but instead of a few thousand volumes on a few shelves, all the volumes of the universe open before them -geologic, ornithologic, conchologic, botanic, astronomic, philosophic. No more need of Leyden-jars, or voltaic piles, or electric batteries, standing as they do face to face with the facts of the universe.

What are the historians doing now? Studying history yet but not the histery of a few centuries of our planet only, but the history of the eternities -whole millenniums before Xeno-Adam was born. History of one world, history of all worlds.

What are our departed astronomers

not through the dull lens of earthly observatory, but with one stroke of wing going right out to Jupiter, and Mars, and Mercury, and Saturn, and Letter. Orion, and the Pleiades-overtaking and passing swiftest comet in their flight. Herschel died a Christian. Have you any doubt about what Herschel is doing? Isaac Newton died a Christian. Have you any doubt about what Isaac Newton is doing? Joseph Henry died a Christian Have you any doubt about what Joseph Henry is doing? They were in discussion, all these astronomers of earth, about what the aurora borealis was, and none of them could guess. They know now; they have been out there to see for themselves.

What are our departed Christian chemists doing? Following out their own science, following out and following out forever. Since they died they have solved 10,000 questions which puzzled the earthly laboratory. They stand on the other side of the thin wall of electricity, the wall that seems to divide the physical from the spiritual world, the thin wall of electricity, so thin the wall that ever and anon it seems to be almost broken through-broken through from our side by telephonic and telegraphic apparatus, broken through from the other side by strange influences which men in their ignorance call spiritualistic manifestations. All that matter

But what are the men of the law, who in this world found their chief joy in the legal profession-what are they doing now? Studying law in a universe where everything is controlled by law from flight of humming-bird to flight of world-law, not dry and hard and drudging, but righteous and magnificent law, before which man and cherub and seraph and archangel and God himself bow. The chain of law long enough to wind around the immensities and infinity and eternity. Chain of law. What a place to study law, where all the links of the chain are in the hand!

What are our departed Christian friends, who in this world had their joy in the healing art, doing now? Busy at their old business. No sickness in heaven, but plenty of sickness on earth, plenty of wounds in the different parts of God's dominion to be healed and to be medicated. You can not understand why that patient got well after all the skillful doctors of New York and Brooklyn had said he must die. Perhaps Abercrombie touched him-Abercrombie who, after many years' doctoring the bodies and the souls of people in Scotland, went up to God in 1844. Perhaps Abercrombie touched him.

What are our departed Christian friends doing in heaven, those who on earth found their chief joy in the Gospel ministry? They are visiting their old congregations. Most of those ministers have got their people around When I get to them already. destined to go to that place-I will come and see you all: Yea, I will come to all the people to whom I have administered in the Gospel, and to the millions of souls to whom, through starve." the kindness of the printing press, I am permitted to preach every week in this land, and in other lands-letters coming from New Zealand and Australia, and uttermost parts of the earth, as well as from near nations, telling me of the souls I have helped-I will visit them all. I give them fair notice. Our departed friends of the ministry are engaged in that delectable entertainment now.

But hark! the bell of the cathedral rings-the cathedral bell of heaven. What is the matter now? There is going to be a meeting in the temple. Worshipers all come through the aisles. Make room for the conquerer. Christ standing in the Temple. All heaven gathering around him. Those who loved the beautiful come to look at the Rose of Sharon. Those who loved music come to listen to his voice. Those who were mathematicians come to count the years of his reign. Those who were explorers come to discover the height and the depth, and the length and the breadth of his love. Those who had the military spirit on earth sanctified, and the military spirit in heaven, come to look at the captain of their salvation. The astronomers come to look at the morning star. The men of law come to look at him who is the judge of quick and dead. The men who healed the sick come to look at him who was wounded for our transgressions.

All different and different forever in many respects, yet all alike in admiration for Christ, in worship for Christ, and all alike in joining in the doxol-

"Unto him who washed us from our sins in his own blood, and made us kings and priests unto God, to him be glory in the Church throughout all ages, world without end?" Amen.

THE CAMP FIRE.

IMPORTED GOLD LACE.

It is a singular fact that the United States, while strong in resources, is entirely dependent upon foreign countries for the gold and tinsel which are used in decorating her officers of the redeemed in heaven spent some of their army and navy when on dress parade. A military officer, no matter what flag he fights under, must have a certain amount of glitter about his shoulders, or he cannot do justice to the Government which employs him. Epaulets and shoulder knots are as essential to a well-regulated army or navy as are the guns and ammunition used on the enemy. Yet, in spite of the fact that there are six or seven thousand officers in the service of the United States who must have gold cord, gold lace, and gilded epaulets, there is not a single manufactory in the country where this "war material" can be made. Every piece used in the decorations of uniforms of the regular, as well as the vast quantity which goes to adorn the militia of the different States, comes from England. An officer of the Quartermaster's Department of the army tells me that the reason that none is manufactured is the fact that the plant necessary to establish the business on a paying phon, or Herodotus, or Moses, or scale would cost a million dollars at least, and that there is no absolute evidence that the stuff could be made here as cheap as in England. At all doing? Studying astronomy yet, but events, no one as yet had the hardihood to risk so great a sum in the establishment of a business which must necessarily be restricted .-- Washington

OLD WARRIORS MEET.

When a couple of old warriors meet

pathetic. A meeting took place a short time ago between an old Union General-now connected with one of the numerous railroads entering Chicago-and an ex-Confederate Colonel. After the introduction, the Southern man remarked quietly: "We met once before, General, in '62." The General racked his memory, but could not recall the incident. The Colonel smiled, and without a word took a set of false teeth out of his mouth. A great light suddenly burst upon the General. 'Why, you're not the man-down in Missouri?" "That's me." "Why, great Scott, man, I thought I killed you!" Then for the next five minutes the two old men wrung each other's hands, and talked as never two old men talked before. After they had partially regained their composure, the Stroller, who was an interested listener, learned that in '62 the General with his staff was riding through a thinly inhabited portion of Eastern Missouri, and, coming across a little farm house, the General dismounted and asked a small boy to get him a drink of milk. While talking to the boy a bullet suddenly whistled past, a little too close for comfort, the General thought. He immediately ran toward the house, and discovered a man in the act of loading his rifle. The General clubbed his revolver and struck the rebel a fearful blow in the face. He dropped, the General supposed, dead. It developed, however, that he had only knocked all his teeth out. The two old heroes talked for something like an hour, and when they parted the General was heard to say that he'd buy the Colonel a new set of teeth .-Chicago Journal.

WHO GOT MY MEAT?

As the first Iowa Cavalry was marching through Arkansas, one day we came to a wood which we had to pass through. As we were riding along we emerged into an opening or clearing, in which stood a commodious log house; and what most struck my eye was a good-sized log smoke-house, and the prospects of full rations struck me still more forcibly. We dismounted and, tying my horse to a fence post, I advanced on that smoke-house, when behold, it was locked; but not wishing to be balked of my contemplated feast, I ran back and then forward and planted both feet against it, when the door gave away with a crash. Entering, I saw such a sight as never hungry soldier saw before. Hams and shoulders, side meat by the hundreds of pounds, hung temptingly arrayed before us. Selecting a large-sized ham and shoulder, one in each hand, I heaven -as by the grace of God I am started for the door, where I confronted a woman and half a dozen tow-

headed youngsters. She said: "For heaven's sake, men, don't take it all. My children will

That hurt me, but I braced up and said: "I am hungry, too; and we don't get such fare often."

In just twenty minutes there was not enough meat in that smoke-house to feed a cat. Well, I got to my horse, and tied a ham on one side and a shoulder, on the other, and we were just fairly mounted, when an order came along the line to charge forward, in hopes of capturing some guerillas which some of the men in scouting around had discovered.

Away we went, pell mell, hurry scurry, in disregard of all military discipline, at full gallop. Away went my ham and shoulder, swinging up and down with a force that took my little horse from one side of the road to the other, but I hung on to them for a half mile, when I thought, "This will never do," so I cast my eyes around for a good place to leave them; and in a ravine a little way ahead I thought I could throw them under a small bridge which came in my way, so loosening the string I threw them down without stopping, and thought I would come back and get them when we went into camp. Then we were ordered to search all the houses in our way, but we did not find anyone, and soon came to a village, which the boys eatables the two small stores contained. Accommedations for 300 Guests. I did not take any myself, for I thought I would have all I would want to carry when I got my meat.

Well, we soon started back to get into our line of march, and I was in a hurry to come up with the ravine where I supposed my meat was se- \$2.00 and \$3.00 per day curely hid. Imagine if you can my feelings when I found them gone! I cannot adequately express my feelings. I never found out who got them, but some one of the boys that saw me throw them there, I suppose. It has been over twenty years, but I would

Fresh Mummies Dug Out.

The following are extracts from a private letter of Rev. James S. Dennis,

D., of Newark, now in Syria: The excavations and discoveries at Sidon still continue with remarkable results. The number of sarcophagi at present brought to light is eighteen, and some of them are most magnifient, and will rank high among. archæological treasures. They are of enormous size, and the sculpture is elaborate and in perfect preservation. Jpon one of them alone are eighteen almost detached statues, about three feet in height, without a single scratch, and of pure marble.

The most remarkable of them came to light last week. It is an ancient Phœnician sarcophagus, which had never been opened, and contained a mummy and a large amount of jewelry of great value. The mummy, when unrolled, was found to be the body of a man in middle life, and the state of preservation was astonishing. features, and in fact the entire body, were intact; the flesh was tender, and yielded to pressure; and teeth, hair, and viscera were all in place. Upon the outside lid of the sarcophagus is an inscription of seven and a half lines in Egyptian hieroglyphics. The bi-lingual inscription of such an ancient date excites great expectations. We shall have to wait to have it deciphered by the savants before we can know the full value of the statements it contains. The sarcophagus is of black basalt such as comes from Egypt, and it may have been made in Egypt by order from Sidon. The date of it is, of course, a matter of conjecture as yet. It may be anywhere from 800 to 1500 B. and even older. This strange being who has been brought forth literally from the tomb of the ages to face the nineteenth century—who is he? What if he should be Ethbaal, "King of the the scene is usually affecting, if not Zidonians" and father of Jezebel, or some older king who flourished in the earlier days of "Great Zidon?" It is more than probable that he was a royal

or princely character. The value of this enormous find is roughly estimated as approaching a sum not far from \$800,000. One of the European consuls in Beirut has offered \$25,000 for one of the sarcophagi. was not accepted, and the Turkish overnment is boxing the entire lot, and have sent a special steamer to transport them to Constantinople.

The discovery of the sarcophagus of Ashmunazer, in 1885, just outside of Sidon, was regarded as an important event. It also had a Phænician inscription of twenty-two lines, and several interesting data were gathered from it. This is a far more marvelous and magnificent upturning of old Sidonian remains.

The excavations still continue, and other treasures may be brought to light. A government official—Hamdy Bey from Constantinople is supreintending the operations. These are days of great archæological wonders. Think of the old Pharaohs on exhibition in the Boulak museum in Cairo.

If you are troubled with weak eyes never sift ashes while facing the wind. Get your wife to do it, or wait till the wind shifts to another quarter. -

Gen. Moses Cleveland, the founder of the City of Cleveland in 1796, is to have a bronze statue in that city. The figure stands seven feet and six inches nigh. The General is represented standing erect, with a staff and a surveyor's level in his hands. He is bareheaded, and is dressed in the ordinary outdoor garb of his time.

Experiments are believed to show that aseptol, or orthopenot-sulphate, is destined to take the place of carbolic acid as a disinfectant and antiseptic. It is a syrupy, brown fluid of aromatic odor, and soluble in alcohol, glycerine, and water, and is not irritating in as strong as 10 per cent solutions. As an antiseptic it is said to equal carbolic acid, while possessing also the advantage of pleasanter odor, more solubili-

A NEW ERA! SAL-MUSCATELLE

The crystallized salts as extracted from grapes and fruit; a most wonderful product from Name's laboratory; the greatest sovereign preparation everplaced before the American public.

Sal-Muscatelle is Nature's own product; it supplies to the weary system the want of sound, ripe grapes and fruit; it keeps the blood pure and the brain clear; is a natural blessing to the fagged-out and weary, an imperative companion to business men, ladies and thildren. Have it in your homes, travels, summer resorts and seaside cottages.

JAMES NALL & CO. 161, 163 & 165 JEFFERSON AVENUE,

CHICAGO, ROCK ISLAND & PACIFIC R'Y

By reason of its central position, close relation to principal lines East of Chicago and continuous lines at terminal points West, Northwest and Southwest—is the only true middle-link in that transcontinental system which invites and facilitates travel and traffic in either direction between the Atlantic and Pacific.

The Rock Island main line and branches include Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davemport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Cuthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, St. Joseph, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minneapolis and St.

THE CREAT ROCK ISLAND ROUTE

Guarantees Speed, Comfort and Safety to those who travel over it. Its roadbed is thoroughly ballasted. Its track is of heavy steel. Its bridges are solid structures of stone and iron. Its rolling stock is perfect as human skill can make it. It has all the safety appliances that mechanical genius has invented and experience proved valuable. Its practical operation is conservative and methodical—fts discipline strict and exacting. The luxury of its passenger accommodations is unequaled in the West—unsurpassed in the world.

ALL EXPRESS TRAINS between Chicago and the Missouri River consist of comfortable DAY COACHES, magnificent PULLMAN PALACE PARLOR and SLEEPING CARS, elegant DINING CARS providing excellent meals, and—between Chicago, St. Joseph, Atchison and Kansas City—restful RECLINING CHAIR CARS.

THE FAMOUS ALBERT LEA ROUTE Is the direct, favorite line between Chicago and Minneapolis and St. Paul. Over this route solid Fast Express Trains run daily to the sunmer resorts, picturesque localities and hunting and fishing grounds of Iowa and Minnesota. The rich wheat fields and grazing lands of interior Dakota are reached via Watertov. A short desirable route, via Seneca and Kankakee, offers superior inducements to travelers between Cincinnati, Indianapolis, Lafayette and Council Bluffs, St. Joseph, Atchison, Leavenworth, Kansas City, Minneapolis, St. Paul and intermediate points.

mediate points.
All classes of patrons, especially families, ladies and children, receive from officials and employes of Rock Island trains protection, respectful courtesy and kindly attention.

The Keeper's Story.

Our inland readers may not know that the whole of the Atlantic coast is scrub, came suddenly upon a camp of guarded by the Life Saving Service, whose stations are erected along the dangerous parts of the shore, at intervals of not more than three or four miles. During every night from September until May, a patrol is kept up by the crews of these stations along the whole stormy coast.

A visitor, one November night, at a lonely station on the New Jersey shore, questioned Kendall the keeper of the crew, as to the heroism of his men. He had been a surfman for ground, convulsed with laughter. Inmany years. The fight with storm and stead of molesting the traveller, they sea in winter nights was an ordinary caught his horse for him, and sent him matter-of-fact to him, as much as the away with a laughing chorus. planing of wood is to a carpenter.

"Heroism? We don't call our work by that name," he said dryly. "The men know what they've got to do, and they don't shirk it. They've got to be tough, cool hands, and to know the

"Do the passengers of shipwrecked vessels usually show courage?'

"More than you'd expect. Women that shriek about a mouse or snake on shore keep quiet often when the ship's goin' down. They usually object to the life-car. It's an air-tight shell, in which eight or ten people can be shut up. It's swung on a cable, and dragged through the sea to shore. Women sometimes prefer to drown to

Just then the keeper went out to they set out, and then came back.

"was little Bill Fletcher."

to follow the water, like all the other at last it could neither move nor offer Fletchers. But something ailed his hip and back. He was always crooked "I thought that now, probably, the and sick. He tried book larnin', but time had come for the spider to begin in his crippled little body.

owned the Maria which run for lum- ed and cut another thread; then ber down to North Carolina. One mounting again, repeated the perv'yage he took his wife an' his two formance. children an Bill along. Comin' home the Maria run on this bar here one times, loosening all the lower one times, loosening all the lower stormy night, and was wrecked. It threads, and making them fast higher was so dark that we fired the line six up, until it had hoisted its prey to the times before we got it to her. When mouth of its den. Having accomthe cable was made fast, I went out on plished this, it shut itself up to enjoy the breeches-buoy. The schooner was the fruits of its toil; but it seemed to goin' to pieces so fast, 'twan't no use me such an intelligent spider, that I tryin' to fetch the car. She had parted thought it worthy of being preserved amidships, an' John Fletcher, an' Bill, in spirits of wine." an' the kids, an' three women was there on her hull at the starn.

"I signalled the crew to fetch the life-boat. The sea was runnin' tremendous, and the night was black as Scientific American, may be found ink. I thought the men would never useful during the bathing season. The reach us alive, but old Dan was at the chief reason, it says, why good swimstarn, an' he fetched her. We got the mers are so often drowned when they women into the boat, an' the children, are accidently thrown into the water an' then John took holt of the cripple is that the shock causes them to lose to lift him in. There was room for but their presence of mind. That leads to one more, an' they both saw it.

an' children, I'm no use to anybody.

to the boat. 'Twan't no time for exchangin' compliments. But Bill slipped swimming schools, the pupils are taken from him like an eel, an' ran back of out boat-riding, and purposely upset, the mast. When I went after him, the as though the upsetting were accidentsea was washin' over the deck, an' I al. thought it was empty. I crowded They are also suddenly pushed over-John aboard the life-boat, and they all board, and subjected to various pregot safe to shore. I went back in the pared accidents, so as to accustom breeches-buoy.

"When morning came we went out agen, an' there was Bill tied to the danger, and protected against loss of mast quite dead. There was a look on his face as if God had given him something to do, an' he had done it.

"D'ye know, that on dark nights an' high seas that I almost always think of the noble spirit shown by that poor little cripple. 'Twas a mighty good example he set most of us. We shall never forget him. Well, good-night, sir," and strapping on his lantern, he set out on his patrol along the edge of the thundering surf. - Youths Companion.

Saved by a Laugh.

The judgement which a superior race passes upon an inferior race is arbitrary. When a white man gauges a black man, he usually stands him alongside of a fine specimen of the white race. If an English Australian is asked what graded race, physically and intellectu- mind. ally, in the world. Yet the black Australian is a match for any race under the sun, in swimming, diving, running, climbing, or picking up a trail. Men who can do these things are not physicially degraded.

But, my dear sir," the Australian Englishman will add, "these blacks are so low down, mentally, that they have never invented a bow and arrow."

But they have invented the boomerang, the most ingenious and scientifically constructed of projectiles, and the only weapon which will do what the Irishman wished his gun would do:

'Shoot around the corner of a hedge." Necessity is the mother of invention. and so long as the Australian black can kill game and enemies with the boomerang or a spear, he has no occasion for inventing a bow and arrow. The ancient Egyptians was highly civilized, yet he never invented an um-A climate where it rains only once in five years does not provoke the most ingenious of men to invent a portable roof.

If man is the only creature endowed with the ability to laugh, the Austra-brain that had been proof to cajolery lian blacks are intensely human. They have the keenest sense of humor, and nothing which has a ghost of a joke in it fails to provoke laughter. A man looking for a pipe which he has in his mouth, or a dog searching for food upsetting something on his head, and then running away, will make them roll on the ground in convulsions of ing the top of the head, round the face

their keen sense of the ridiculous. elder tree, aigrettes, in flowers and They have a bad habit of spearing berries mixed with grass and small travellers, and will follow one for days, white marabout feathers. keeping out of his sight, until they get a good chance to kill him; but they seldom attack a man on horse- of colored piques now. What next?

back. They prefer to spear him when he is off his horse, eating his lunch or drinking at a water hole.

One day a traveller, while riding Grant's book: quickly round the corner of a patch blacks. His horse stopped short, and sent him flying over its head into the middle of the camp. If he had showed the slightest signs of alarm, a dozen spears would have been quivering in

But he, knowing them, burst into shrieks of laughter, as if he had tumbled headlong into their camp for a joke. The blacks were delighted; all of them began to laugh, and the camp was a scene of men rolling on the

An Ingenious Spider.

Spiders are not looked upon with much favor by people in general, though they are a very bright, intellectual folk, with a decided apitude for geometry. They are the only animals which are known to construct with the property of the propert nets for the capture of prey. The following example of their ingenuity is from the notes of a traveller in New Guinea. "I saw," he says, "a small spider which had spun its web under the edge of one of my boxes, and per six inches wide and 6,720½ miles taken a butterfly at least ten times its long. own size. No sooner did the latter find itself caught, than it began to ing day and night, more than 1,000 flutter. I then watched the spider's proceedings.

meet the patrol, who were coming threw itself upon its victim, but withthrough the driving storm along the out injuring it. Looking attentively, beach. He received the tokens which I saw that it attached a thread to the they exchange with the men from the end of one wing, with which it ran next station, watched the next men as away, and made it fast to the box, so "The coolest hand I ever saw in a wing. The spider then descended that the butterfly could not stir this shipwreck," he said, lighting his pipe, again, and repeated the performance "That's so," growled the dripping and forwards on similar errands eleven at the other wing. It went backwards men who were crowding about the fire. times, on each occassion diminishing "Bill was a sickly chap. He wanted its poor victim's power to flutter, until

his eyes giv' out. Twice he says to me, 'Cap'n,' he says, 'I wish I could be "I saw it descend again, and unhook" of some use in the world.' He had one wing from the side to which it that kind of a spirit, like boilin' water, was fastened; the spider then climbed "Well, John Fletcher, his brother, having secured the wing, it re-descendup, endeavoring to raise its prey and

Hints to Swimmers

The Open Sesame.

I was a spectator yesterday of an incident which illustrated the association of ideas, and perhaps some other things. I came upon a group whose attitude expressed a pained and puzzled interest. The centre figures were two very young children holding each other by the hand, one sobbing, the other keeping back the tears. About them were kindly intentioned women plying the little things with questions increase of 33,473,363 over last year. and receiving answers altogether unsatisfactory when not unintelligible. The children had wandered from home. and either from confusion or because they could not speak plainly it was impossible to learn from them where they lived. The mothers in the group tried baby talk with no success, and I was about to venture an experiment of my own when up stepped a school girl of 10 years with "Lemme try." Bending over the bigger of the little ones she asked: "Where do you buy your candy?" Intelligence and speech awoke together in the sacred little and anxiety, and quick the answer came: "At Smithses." The link connecting the runaways with home had been found, and the discoverer marched off leading them in triumph. -Boston Post.

A correspondent, writing from the Thousand Isles in the Scientific American, tells of a plan which he devised to get water pumped for use in his house by utilizing a small part of the waste energy of the St. Lawrence river. The apparatus was very simple, and consisted of a framework of wood hung between two uprights driven firmly in the beach just at the point where the incoming waves attained their greatest velocity just before breaking. At the bottom of this was hung a trough made of two boards joined at their edges at right angles, and at the proper height, to secure a full immersion in an ordinary wave; the concave side, of course, toward the open water. This float rose and fell with each wave, and at each motion worked the piston of a pump to a greater or less degree, according to the size of the wave. This contrivance was found satisfactory, as it pumped an ample supply of water for his household needs, cost but onethird of what a windmill would, and did not make an unsightly feature of his landscape. No reason is perceived why the same devise might not be employed on large bodies of water as a means of furnishing cheap power.

Mr. T. J. Murphy, 61 Debavoice Place, Brooklyn, N. Y., says: "I was afflicted with sciatic rheumatism and found St. Jacob's Oil very efficacious." Sold by Druggists and Dealers everywhere.

To keep your house from being burglarized, leave a big watermelon on the back porch—Macon Telegraph.

The Cutest Little Things. "Cute"! he echoed. "Well, I don't know as the adjective would have occurred to me in just that connection. But if you mean that they do their work thoroughly, of sudden accidents can only be gained by experience, just as everything else or weakness; and, in short, are everything that a pill ought to be, and nothing that it ought not, then I agree that Pierce's Pleasant Purgative Pellets are about the outest little things going!

A Perilous Postponement.

To postpone, when the duty for immediate action is clear, is always unwise. Especially is to medication. Diseases of the kidneys and bladder are often of swift growth-always of fatal tendency if not combatted at the outset. We have all—even these of us who are not remarkably well instructed—heard something of the danger atinstructed—heard something of the danger attending Bright's disease, diabetes, and other diseases of the kidneys or bladder. Let no one be foolbardy enough to procrastinate if he perceives the renal organs to be inactive. Hostetter's Stomach Bitters are peculiarly adapted to overcome this inaction, to sufficiently stimulate, without exciting, the kidneys and bladder. Infinitely is this diuretic to be preferred to the impure and fiery stimulants of commerce, which prove the bane of unwary persons with a tendency to renal troubles. They are likewise incomparable for dyspepsia, debility, fever and ague, and biliousness.

NVALIDS' HOTELAND SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you cometand visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, fincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

By our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consultation. While we are always glad to see our patients, and become acquainted with them, show them our institutions, and familiarize them with our system of treatment, yet we have not seen one person in five hundred whom we have cured. The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous, if we view it in the light of the early ages. Take, for example, the electro-magnetic telegraph, the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with the most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be in Florida or New York as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is required is the knowledge of certain signs. From these scientists deduce accurate conclusions regardless of distance. So, also, in medical science, diseases have certain unmistakable signs, or symptoms, and by reason of this fact, we have been enabled to originate and perfect a system of the present the present and perfect a system of the present and perfect a

examining our patients. In recognizing diseases without a personal examination of the patient, we elaim to possess no miraculous powers. We obtain our knowledge of the patient's disease by the practical application, to the practice of medicine, of well-established principles of modern science. And it is to the accuracy with which this system has endowed us that we owe our almost world-wide reputation of skillfully treating lingering or chronic affections. This system of practice, and the marvelous success which has been attained through it, demonstrate the fact that diseases display certain phenomena, which, being subjected to scientific analysis, furnish abundant, and unmistakable data, to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The most ample resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. Full particulars of our original, scientific system of examining and treating patients at a distance are contained in "The People's Common Sense Medical Adviser." By R. V. Pierce, M. D. 1000 pages and over 300 colored and other illustrations. Sent, post-paid, for \$1.50. Or write and describe your symptoms, inclosing ten cents in stamps, and a complete treatise, on your particular disease, will be sent you, with our terms for treatment and all particulars.

common sense as applied to medicine.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or

By thorough organization, and subdividing the practice of medicine and surgery in this institution, every invalid is treated by a specialist—one who devotes his undivided attention to the particular class of diseases to which the case belongs. The advantage of this arrangement must be obvious. Medical science offers a vast field for investigation, and no physician can, within the brief limits of a life-time, achieve the highest degree of success in the treatment of cvery malady incident to humanity.

OUR FIELD OF SUCCESS.

NASAL, THROAT LUNG DISEASES.

We publish three separate books on Nasal, Throat and Lung Diseases, which give much valuable information, viz: (I) A Treatise on Consumption, Laryngitis and Bronchitis; price, post-paid, ten cents. (2) A Treatise on Asthma, or Phthisic, giving new and successful treatment; price, post-paid, ten cents. (3) A Treatise on Chronic Nasal Catarrh; price, post-paid, two cents.

Dyspepsia, "Liver Complaint," Obstinate Constipation, Chronic Diarrhea, Tape-worms, and kindred affections are among those chronic diseases in the successful treatment of which our specialists have attained great success. Many of the diseases attained great success. Many of the diseases attained great success. Many of the diseases of the process of digestion, are very obscure, and are not infrequently mistaken by both laymen and physicians for other maladies, and treatment is employed directed to the removal of a disease which does not exist. Our Complete Treatise on Diseases of the Digestive Organs will be sent to any address on receipt of ten cents in postages stamps.

BRIGHT'S DISEASE, DIABETES, and kindred maladies, have been very largely treated and cures effected in thousands of cases which had been pronounced beyond hope. These diseases are readily diagnosticated, or determined, by chemical analysis of the urine, without a personal examination of patients, who can, therefore, generally be successfully treated at their homes. The study and practice of chemical analysis and microscopical examination. practice of chemical analysis and microscopical examination of the urine in our consideration of cases, with reference to correct diagnosis, in which our institution long ago became famous, has naturally led to a very extensive practice in diseases of the urinary organs. Probably no other institution in the world has been so largely patronized by suffers from this class of maladies as the old and world-famed World's Dispensary and Invalids' Hotel. Our specialists have acquired, through a vast and varied experience, great expertness in determining the exact nature of each case, and, hence, have been successful in nicely adapting their remedies for the cure of each individual case.

These delicate diseases should be carefully treated by a specialist thoroughly familiar with them, and who is competent to ascertain the exact condition and stage of advancement which the disease has made (which can only be ascertained by a careful chemical and microscopical examination of the urine), for medicines which are curative in one stage or condition are known to do positive injury in others. We have never, therefore, attempted to put up anything for general sale through druggists, recommending to cure these diseases, although possessing very superior remedies, knowing full well from an extensive experience that the only safe and successful course is co carefully determine the disease and its progress in each case by a chemical and microscopical examination of the urine, and then adapt our medicines to the exact stage of the disease and condition of our oatient.

WONDERFUL
SUCCESS.

To this wise course of action we attribute the marvelous success attained by our specialists in that important and extensive Department of our institutions devoted exclusively to the treatment of diseases of the kidneys and bladder. The treatment of diseases of the urinary organs having constituted a leading branch of our practice at the Invalids' Hotel and Surgical Institute, and, being in constant receipt of numerous inquiries for a complete work on the nature and curability of these maladies, written in a style to be easily understood, we have published a large Illustrated Treatise on these diseases, which will be sent to any address on receipt of ten cents in postage stamps.

dred affections, are speedily, thoroughly and permanently cured.

To those acquainted with our institutions, it is hardly necessary to say that the Invalids' Hotel and Surgical Institute, with thebranch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment and cure of those affections which the world for the treatment and cure of those affections which is from youthful indiscretions and pernicious, solitary practices. We, many years ago, established a special Department for the treatment of these diseases, under the management of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced specialists.

WE OFFER
NO APOLOGY.

We offer no apology for devoting so much attention to this neglected class of diseases, believing no condition of humanity is too wretched to merit the sympathy and best services of the noble profession to which we belong. Many who suffer from these terrible on doing good and alleviating suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there is probably none about which physicians in general practice know so little. We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suffering from any of these delicate diseases.

FRACTICE.

Hundreds of the most difficult operations known to modern surgery are annually performed in the most skillful manner, by our Surgeon-specialists. Large Stones are safely removed from the Bladder, by crushing, washing and pumping them out, thus avoiding the great danger of cutting. Our specialists, remove cataract from the eye, thereby curing blindness. They also straighten cross-eyes and insert artificial ones when needed. Many Ovarian and also Fibroid Tumors of the Uterus are arrested in growth and cured by electrolysis, coupled with other means of our invention, whereby the great danger of cutting operations in these cases is avoided.

Especially has the success of our improved operations for Vari-

cutting operations in these cases is avoided.

Especially has the success of our improved operations for Varicocele, Hydrocele, Fistulæ, Ruptured Cervix Uteri, and for Ruptured Perineum, been alike gratifying both to ourselves and our patients. Not less so have been the results of numerous operations for Stricture of the Cervical Canal, a condition in the female generally resulting in Barrenness, or Sterility, and the cure of which, by a safe and painless operation, removes this commonest of impediments to the bearing of offspring.

A Complete Treatise on any one of the above maladies will besent on receipt of ten cents in stamps.

Buy a cake of Lenox and you will soon understand why.

THURSDAY, AUG. 11, 1887 An episode not creditable to anybody concerned, occurred in Detroit Sunday evening. Ex-Mayor W. W. Wheaton was assaulted and severely beaten on the street by two men for an alleged insult to the wife of one of them, Herbert O. Allen, hardware clerk for Limbach & Weber. The story of Mrs. Allen, given to a Free Press reporter, is that Mr. Wheaton, with whom she was letter recently written upon the subject wholly unacquainted, accosted her on of Mr. Blaine's candidacy. After dethe street, offered her his card, and said he would pay her well to become should do all he could to secure Mr. acquainted with her; and that she Blaine's election in the event of his "slapped the card out of his hand" and nomination, the Senator added, "He is went into a store in great indignation. more injured than benefitted by the We desire to say, in advance of the activity of his friends in making divislegal investigation which Mr. Wheaton threatens, and in advance of any ence was to the invasion of states havknowledge whether he could be the scoundrel and idiot that that story implies, that upon this showing the case but for those influences from without, looks more discreditable to Mrs. Allen the delegations would not be divided. and her husband than to Mr. Wheaton, That is conspicuously true of Ohio and and brings them into notoriety that of Illinois, and of New York; and the any person of delicacy and refinement result is an intensity of opposition to would avoid. She is blazoned in the the Maine candidate, on the part of a papers as "extraordinarily beautiful," with "eves blacker than the beads she that goes far beyond all personal and wore," and "mouth voluptuous." What local preference, and which in the last there was in her style and manner that mentioned state cost him and his party should cause her to be approached in a national defeat at the polls. such a way is not stated, but the public will infer that it must have existed. This is the notoriety that she incurs, and her husband becomes liable to criminal prosecution with very slender evidence to justify his assault and with fair probability of utter mistake in identity on the very best construction. But what we wish to emphasize most is the dangerous readiness of people to accept the truth of such accusations against a man, and to justify his immediate condemnation and the execution of private yengeance even to the with no opportunity for disproof. This course, be indignant protest against the was well illustrated in the present case. While the two men had Mr. Wheaton down in the gutter, beating him with a club, a stranger chanced along, who drew a revolver and threatened to victed last week of abusing their ofshoot if they did not let the man up. ficial trusts for personal profit, and sen-"He insulted my wife," said Allen, and tenced, seven of them to two years in that satisfied the stranger, who put his the penitentiary, and four to a fine of pistol in his pocket and interfered no \$1000 each. Surely, when influential more, though he could not know but it | politicians who can manipulate the was a case of highway robbery and primaries and the elections so as to put murder. In the South, this sort of vio- themselves in office can be convicted lence is of almost daily occurrence, al- and sent to the penitentiary merely for most always against negroes, and al- plundering the public, in New York most always involving the taking of and Chicago and Cincinnati, we may life, with scarcely ever an opportunity take heart and hope that popular govfor defense against the accusation or a ernment is not a failure. protest from anybody. As with the Detroit stranger who put up his revolver and left the assailants to murder Mr. Wheaton if they chose, it only needs to be whispered against any negro in the South, by any one desiring to get him out of the way, that he has insulted or assaulted some woman, to close at once against him every ear, and the community complacently sees the hapless and helpless victim dragged from his cabin by night, or from the jail where he has been confined on some petty charge, and butchered. here is no doubt that the dispatches of this sort that come continually from the South cover large numbers of political crimes, since undisguised political murders have become impolitic; and the number reported suggests how many there must be of which we never hear, in communities so sparse and

AFTER profuse predictions sent out through the press during the last two months that Texas would give a great vote for the prohibition amendment, with a good prospect of its adoption, the count of the vote at last week's election shows an adverse majority of more than one hundred thousand. The predictions had not been received with great confidence, in view of the fact that the state gave a democratic majority of 150,000, and of the further fact that the name of the Lone Star State st., Chicago, writes: Ladies need has not been much associated in the have no fears about wearing Dr. but the persistence of their reiteration, and the espousal of prohibition by some prominent democrats, had prepared us to be surprised at the overwhelming "wet?" majority, The state voted at the last presidential election, 225,000 democratic, 81,000 republican, and 19,-000 prohibition; and at the gubernatorial election last fall, 130,000 democratic, 66,000 republican, and 19,000 prohibition.

THE Dutch didn't capture Holland this year with quite their usual emphasis. The democratic majority in the Kentucky state election is about 20,000. At, the last state election, two years galding extremities. ago, it was 85,603.

Glenn school bill in Georgia as wicked | ping, &c., &c. and stupid, both in its principle and in the excessive penalties of fine and imprisonment it prescribes for teaching over a thousand physicians of Chiwhite and colored pupils in the same cago. Used by U. S. army and school. We really have hope for the navy. Free Press.

VERY pathetic indeed is the confiding trust with which Mr. George William Curtis clings to his theory of the President's absorbing devotion to the principles of civil service reform, while at the same time confessing and lamenting the utter failure of the President to put any of those principles in practice. "It is now possible," he says, "to judge correctly the course of the administration in regard to reform, and I regret to say that in the two years and five months of its existence there has been a very significant change in the civil service." "Practically there has been a very general partisan reconstruction of the national civil service." "It would be a great wrong to the cause of which the league is the authorized national representative if it

did not declare that it does not regard the administration as in any strict

D. R. KNICKERBOCKER, PHYSICIAN AND Surgeon, corner of Adams and Emmet Sts., Ypsilanti. Telephone at residence. The Upsilantian. did not declare that it does not regard the administration as in any strict sense of the words a civil service reform administration." Should the President formally renounce the reform principles that he has declared, Mr. Curtis thinks his reëlection would be seriously periled; but to avert that peril he reiterates his entire confidence in Cleveland's sincere devotion to the principle. It is touching, and also

AYER'S Sugar-Coated Cathartic If the Liver becomes torpid, if the bowels are constipated, or if the stomach fails to perform its functions properly, use Ayer's Pills. They are invaluable.

For some years I was a victim to Liver Complaint, in consequence of which I suffered from General Debility and Indigestion. A few boxes of Ayer's Pills restored me to perfect health.—W. T. Brightney, Henderson, W. Va.

For years I have relied more upon Ayer's Pills than anything else, to

Regulate

my bowels. These Pills are mild in action, and do their work thoroughly. I have used them with good effect, in cases of Rheumatism, Kidney Trouble, and Dyspepsia.

—G. F. Miller, Attleborough, Mass.

Ayer's Pills cured me of Stomach and Liver troubles, from which I had suffered for years. I consider them the best pills made, and would not be without them.—Morris Gates, Downsville, N. Y.

I was attacked with Bilious Fever, which was followed by Jaundice, and was so dangerously ill that my friends despaired of my recovery. I commenced taking Ayer's Pills, and soon regained my customary strength and vigors—John C. Pattison, Lowell, Nebraska.

Last spring I suffered greatly from a troublesome humor on my side. In spite of every effort to cure this cruption, it increased until the flesh became entirely raw. I was troubled, at the same time, with Indigestion, and distressing pains in

The Bowels.

By the advice of a friend I began taking Aver's Pills. In a short time I was free from pain, my food digested properly, the sores on my body commenced healing, and, in less than one month, I was cured.

—Samuel D. White, Atlanta, Ga.

I have long used Ayer's Pills, in my family, and believe them to be the best pills made.—S. C. Darden, Darden, Miss. My wife and little girl were taken with Dysentery a few days ago, and I at once began giving them small doses of Ayer's Pills, thinking I would call a doctor if the disease became any worse. In a short time the bloody discharges stopped, all pain went away, and health was restored.

—Theodore Esling, Richmond, Va.

Ayer's Pills, Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Dealers in Medicine.

WM. LAMBIE. "Weep ye not for the dead, neither bemoan him, but weep sore for him that goeth away; for he shall return no more, nor see his native

After being forty-eight years away while wandering around the prairie he | Providence seemed to open a way so Will you suffer with Dyspepsia and Liver Complaint? Shiloh's Vitalizer is guaranteed to cure you.

**The could return to see my native country, not with meaning and weeping but with joy and gladness. There ing, but with joy and gladness. There is something grand and elevating in the Sleepless nights, made miserable by that terrible cough. Shiloh's Cure is great bright blue sea when no land is near and the still more beautiful blue Ashland he told his story to one of the sky bending over all so calm and peace-

I ought to be glad and grateful for a pleasant voyage, good health, and finding some, both old and new, friends wonderful kind. And as a Glasgow minister on board said, the very thought of our loved ones at home when we were far away was suggestive of a prayer for their welfare. Some Canadians I got acquainted with on board treated me with so much kindness and respect that I almost forgot I was alone on the wide, wide sea.

cradle of the deep there comes a fine thrill of delight when solid land comes goods cheap

After landing at Glasgow I took the train up the Clyde to Hamilton, then up the Avon to Strathavon, the town where I was born, in the Parish of Avondale, where the farmers are mosty dairymen, and take their milk early to the station (depot) so that the people in Glasgow can get milk for breakfast and I am glad they use more milk and less beer and whisky than in the brave days of old. The farms and fields are mostly enclosed with hedges, the thorn and the beech alternate, the thorn giving strength to the hedge and the beech retaining its leaves gives shelter to the stock in stormy days. The cows are all Ayrshires, good milkers, and seem to be very quiet as only four smooth wires are used on poor land where hedges do not grow. The country houses that used to be thatched when I was young are nearly all slated now, the farmers are better clothed, and get tea in place of porridge. But a good friend of mine said long ago that tea was a bad substitute for good oat meal porridge; he and I still agree on that subject both in rel over the ownership of an option of theory and practice. Waterloo and Drumclog derived no benefit from the Drumclog derived no benefit from the

My friends in Scotland were willing to admit that the Americans had more enterprise, and went ahead faster than they. And they almost envied them the City of Ypsilanti.

We will sell the city all that portion of land situated on the west side of Water street at C. Ball's cooper shop south to the river on a line with the west sid of Water street, reserving the right of the M. C. R. R. running their track through Water street or a continuance of Water street, for \$150. Truly yours, Deuber Bros.

medicines, but use the best that money on a piece of Duluth property. While they were quarreling the fast anchored Isle would expand like the continent of America they think they could keep up with the American farm occan like flowery praries. And if the continent of America they think they could keep up with the American farm occan like flowery praries. The property of the magnificent forests and great occan like flowery praries. And if the fast anchored Isle would expand like the continent of America they down the property of the magnificent forests and great occan like flowery praries. And if the fast anchored Isle would expand like the continent of America they down the property of the magnificent forests and great occan like flowery praries. And if the fast anchored Isle would expand like the continent of America they could keep up with the American farm occan like flowery praries. er as well as they do with the American sailors, with their fast yachts built on the Clyde, their expansion engines their Scotch captains and steamships of steel, that hold their own so well on the great free flowing sea where all have an equal chance.

It is 98 in the shade while I write, we are weak and weary in the intense heat. Oh that the clouds like a man's hand would come with abundance of refreshing rain.

A Message From Menominee.

DEAR YPSILANTIAN:-Do you care o receive a line from the Upper Peninsula? We left Ypsilanti on Monday July 22, and took at Detroit a steamer that runs from Buffalo to Green Bay, and came through to this city in two and a half days. Menominee is fifty miles this side of Green Bay, and lies on the Bay, a beautiful town as viewed from the steamer. Our route was, of course, by way of Mackinac straits. We stopped at Port Huron, Cheboygan. Mackinac Island and Escanaba, giving a little time at all these points to disembark and look around a little. We were careful not to get far away. The trip was most delightful. The boat was not elegant though comfortable and safe, the officers gentlemanly and application. accommodating, the passeagers intellithe famous California liquided right accommodating, the passengers interremedy, Syrup of Figs. Its pleasant taste and beneficial effects have rendered it immensely popular. 50c. and \$1 bottles for sale by Fred Davis, on the Wisconsin side, Marinette, are each about eight thousand strong, and both largely lumbering towns. Marinette has some iron interests. Both are live towns. Some of the largest and best managed mills in Northern Michigan are found here. Wages seem very satisfactory to all parties. The common, unskilled laborer, receives two dollars for a day of ten hours. Filers receive from four to seven dollars a day. The improvements in the lumber mills in the last ten years have been marvelous, and the lumber is worked up much more closely. To one who has never been through one of these large first-class mills it would be worth quite a journey to have the sight. The weather here has been at a high-

er temperature and longer so continued than known before by the "oldest inhabitant." Indeed, there have been days when it exceeded Ypsilanti's 104 in the shade, reaching on two or three days 108 in the shade. "How is that for high?" I hope you have shared in the fine rains we have had here this week.

Yours Sincerely,

M. W. FAIRFIELD.

Mortality.

The Argus gives the official report of lent the men bail money to get them deaths in the county for the past year, with the town of Sharon unreported, aggregating 338. This is one death in every 120 persons; a much lower rate than that of the whole country in 1880, which was 1½ in 100; or 8.3 to the thousand here now, against 15 1 to the thousand in the whole country then. Some of the causes of death are given as

Moses Doane, engineer, and the fireman (name not ascertained) were sleeping on the Hiawatha and have not been seen since the fire originated and are supposed to have perished in the flames. A large conflagration was imminent for some time.

An East Saginaw special says:-There has been no rain in this section, the weather is hot, and the atmosphere is a dome of smoke. Fires are doing great damage to standing timber, and in several instances farm buildings have burned. A strip of country between Bluff Creek and Tittabawassee is all ablaze, and a large quantity of logs and camps owned by A. T. Bliss, of Saginaw are in danger. There are heavy fires also in Clare county, and the village of Clare had a narrow escape this afternoon. Two or three residences and other property, valued at obout \$5,000, were burned. In Gladwin county no rain has fallen for and care for the soldiers wounded at weeks, and heavy fires are sweeping Massowah.

through the woods. It is difficult to estimate the damage to timber, but the loss will already approximate \$50,-000, and every day without rain adds to the loss and danger, which threatens to be as great as during the fires of Rocky Mountain region over the oil

Capturing Monkeys.

A gentleman who returned recently from Aspinwall tells the following curious story of the manner in which the natives of the interior of the isthmus of Panama capture monkeys: "Almost all the pet monkeys in this

country," said he, "come from Gorg-

ona, a small village half way on the

line of the Panama railroad. The in-

habitants are mostly native negroes.

for no white man could live in the village a month unless he drank whisky and took quinine constantly. The surrounding country is swampy and covered with a dense mass of luxuriant vegetation. At nightfall a thick miasma rises from the ground and hangs over the forests like a cloud. This place is the monkey's paradise. They travel through the forests in -Henry Bisbee, the 7-year-old son troops, going wherever the king monkey leads. When the natives have been apprised of the presence of a troop they go about warily to capture them. Their plan is a simple one. A hole is cut in the shell of a cocoanut large enough to admit a monkey's paw. The cocoanut is scooped out and a lump of sugar placed in the hollow. A string is then attached to the novel trap and the negroes conceal themselves until the monkeys pass by. Curiosity is one of the chief characteristics of these little creatures, and when they espy the cocoanut lying upon the ground they come down from the trees and proceed to inspect it carefully. The lump of sugar does not long escape their notice, and one of them thrusts a paw through the aper--Charles and Scott Maywood met ture to grab it. With the lump of sugar clasped in his hand he finds it impossible to withdraw it, nor will his greedy nature allow him to abandon his prize. Twenty or thirty are frequently captured at one haul. The natives sell them to the employes of the Panama railroad, who in turn dispose of them to the American market."-New York Mail and Express. A Tragic Love Story.

At about this time—October, 1859 -a white man named Bland was killed by the Wylackies under the following circumstances as stated in the official military report of that date: One day this man in his rambles in the moun tains after game, came across a young Indian girl and fell in love with her at first sight. He carried her away from her people by force but she escaped from him and came to the reservation. One dark night soon after having ascertained her whereabouts he came and forcibly carried her away again from among the Yuka women, where she had been placed while waiting the arrival of her people. The officer in command of the small detachment of regular troops stationed in the vicinity, gave orders to arrest him, but Bland escaped and could not be found. Very soon after this the girl again escaped from him and this time got back to her people but Bland, searched the mountains for months, harassing and annoying the Indians in his endeavors to repossess himself of the woman until one day he met | ary wage laborers would it take to pro-E. Bland Mountain is one of the best known landmarks in the vicinity of Bound Valley Although characterized in the reports of the army officers as a lawless ruffian. Bland, like all the men of his stamp in those early days, had many good points about him and to his utter fearlesness he added an inexhaustible fund of good humor and reckless jollity.-Overland Magazine.

The Pattern Was Out

A lady walked into a city store a few days ago and inquired for a carpet department, to which she was conducted. "You see," she explained, "I bought a piece of carpet here for my parlor, and Samuel, my husband, says nothin' 'll do but we must have more like it. So I want to get the remnant. I don't remember the clerk that waited on me, but I'd know the carpet if I set eyes on it." Threa clerks were kept busy an hour and a half unrolling carpeting for her identification, but the desired remnant didn't come to light. "Dear me, this is very disappointing," said the lady with a tone of vexation, "I felt sure I

could find the rest of it." "When did you buy the goods, madam," inquired the clerk. "O, twenty-two or twenty-three years ago. I know it was just about the time of Lee's surrender and Samuel wished to celebrate, and-" "Ah, madam," said the clerk "I fear the remnant has

A Very Remarkable Bouquet.

The King of Holland received, on his seventieth birthday, a very remarkable gift from the Queen. Her majesty, upon congratulating the King, told him that she had a large bouquet of flowers for him, but it was so heavy that she had asked the ladies in wait ing to bring it in. The door was opened, and several ladies entered carrying an immense bouquet, which they placed before the King. His majesty was greatly surprised when sud denly the top of the bouquet opened, and the head of his infant daughter peeped through the flowers. The King was delighted with this pretty surprise, which we should think has not been equalled since the days of the "four and twenty blackbirds."-Home

"Whip-fans" are being used by fashionable Parisians during the present racing season. The fans mounted on handles exactly resembling a whip, and are painted with racing subjects.

Ex-Empress Eugenie has applied to the city government of Naples for permission to enter the hospital as a nurse

INDUSTRIAL.

Considerable excitement is being created in commercial circles of the production of Colorado. The Hon. James H. Platt, President of the Platt-Washburne Refining Company, New York, and manager of the oil works at Florence, Col., said: There are now twenty wells being worked, producing 700 barrels per day. This is sufficient to supply the demand of this section of the West. A figure lower can be met by Eastern companies. This will shut out of the Colorado market all Eastern oil, including that of the Standard Oil Company, and the question now with the Colorado producers is to handle their product to the best advantage." In speaking of the quality of Colorado oil he said: "Colorado oil is the sweetest and best ever discovered in the world. The Pennsylvania oil is sweeter than the foreign.

"Are you aware of the extent of the toothpick business in Maine?" Mr. J. C. Bridgman, who represents the National Toothpick Association, asked a representative of the Portland (Maine) Press the other day. "That seems to be a pretty big name for small business, I suppose you think," he continued. "But you will be surprised when I tell you that our association have contracted for enough toothpicks to be made in Maine the coming year to load a train of fifty cars with nothing but toothpicks. We shall take out of Maine before next June five thousand million toothpicks. A pretty fair sized wood lot, you see, will be slit up to go into the mouths and vest pockets of millions of Americans. Maine furnishes the larger portion of all the toothpicks used in the country. Our association controls the trade. It is something like the Standard Oil Trust, the Cotton Seed Oil Trust, and the lately formed Rubber Trust. It regulates the price and output of toothpicks as the big trusts regulate the prices and output of oil or rubber goods. We have not adopted the name Toothpick Trust yet, however. We have a mill at Belmont, N. Y.: Harbor Springs, Mich.; and Fond du Lac, Wis. Besides these, all our mills are in Maine; one at Strong, one at Farmington, one at Canton, and two at Dix-There is a small mill at Mechanic Falls, also, but it has not joined our association. In Massachusetts, also, there is one small mill not in the association. So you see Maine is the great center of the industry of toothpick making."

DOES LABOR PRODUCE ALL THE WEALTH?

Rev. Dr. G. M. Steele, in Work and Wages: "Is it really true that 'labor produces all the wealth of the world'? Of course, by labor here is meant the putting forth of physical energy, otherwise suc eading sentences have no meaning. Does any one who think at all about the subject believe that the great factories, the docks, the vast buildings of stone and brick and iron in our great cities, the railroads, the mighty steamships, the complicated machines and innumerable other structures are the result of manuel labor alone? Suppose there is a line of railway fifty miles in length to be built. and five thousand steady, intelligent, and reliable laborers are told to go and build it. Will they be able to build the bridges, to make the deep cuts, to construct the causeways treacherous swamps, to calculate the grades, and do other equally difficult parts of the work? How many ordinduce a Corkiss engine, the first of its kind? No: there must be much besides muscular effort, in order to at. tain these results. There must be toil of brain, long and protracted, and often exhausting thought, sometimes accompanied by great sacrifices and great hardships. In order to exten. sive production there are required great mental qualities, some of them of a rare kind. There is needed power to contrive, to invent, to organize, to direct, or little can be achieved. The man who blows the organ might claim that he produces all the music of the instrument. It is true he is generally an essential condition. No more is manual labor the only or the most essential condition of the production of great wealth."

ARTIC INDUSTRIES. It may not be generally known that important mining operations are carried on within the Artic Circle. Cryolite is brought from Greenland to Philadelphia by the ship load to be used in the making of candles. At Alten, near the North Cape in Finmark, extensive copper mines have been worked for long time.

When it is remembered that most of the work has to be done under ground. and that heat is what the workmen suffer most from, it becomes apparent at once that mines may be as profitable in those high latitudes as they would be on our coast. The main thing is to have communication open once a year for bringing supplies and carrying away the ores.

An engineer who visited the mines

at Alten a few years ago, to study the

condition in which they were worked. found that the climate interposed no obstacle. The mines, when fairly deep, are warmer in winter than in summer. In such work as has to be done above ground, there is scarcely any interruption. During the three dark

months, when the sun does not shine, there is no lack of light to the eye accustomed to the conditions. The sky is clear and starry, the aurora is playing most of the time, and whatever light there is the reflec-

tion from the snow increases and in-More than a hundred and fifty years ago, mining was carried on extensiveabout the shores of the White Sea

by Saxon workmen. Silver, copper, and lead were produced in quantities. Now that the whale fishery has declined, mining enterprise seems most likely of anything to promote exploration and settlement within the Artic

MADOLINE'S FATE.

BY K. T.

CHAPTER I.—CONTINUED.

He stopped abruptly, as though for to the common order of men. a second time he had uttered his

thoughts to closely. Whatever his secret, he could not farm. let this girl share it, and he felt that already he had said too much in her

hearing. Madoline watched him regretfully,

"How will you live-how get food?" she said after a short silence. "You are too ill to help yourself. What will so unconscious!" you do here alone when night comes damp, and the long dark hours will be almost unbearable.'

He smiled in spite of the embarrassing position in which he found himself, in spite of the physical torture he was enduring-for torture it was, to sit erect and talk with composure, while every nerve thrilled with a strain that had well-nigh broken his strength. "If I were not so crippled, I could

exist here quite happily, he replied, looking at the patch of blue sky that showed through the ruined window. "As it is-well, I am at your mercy." There was something so singularly

pathetic in the weakness expressed with so much courage, and on an impulse Madoline held out her hand to

"I will not fail you," she promised, as his hand closed eagerly on her hand. "Fate brought me to you to-day, and I will be your friend."

"The sweetest friend man ever had," he said, his eyes softening as they dwelt on her fair delicate face. "You have given me new life. I only hope if you ever need a man's strength, I shall be near rve you.'

"If I can be us vou, I shall e content," she replied or hand be content," she replied . fell lightly from his hold. "Your safety will be my best recompense-I desire nothing more."

"You are very good," he murmured, a glow of intense feeling illumining his drawn white features. "Yours has been like an angel's visit; I shall

not forget how we have met to-day." "Yet you do not ask me my name," she said, a tinge of color creeping into her cheeks.

His lips contracted, and his deep eyes gazed at her with earnest pride. Because I cannot reveal to you my own. Your kindness does not give me a right to expect from you a confidence I can not return."

But I have no secret," she answered, glancing brightly at him, "and my name is as well known round the country as this old mill is, I am Mandoline, the daughter of Cuthbert Clyde, to whom this land, as far round as the gaze can stretch, belongs. Perhaps you have met my father?" He shook his head.

"No; nor can I meet him now. You will not forget that?"

"I will not forget anything you have told me. As far as it rests with me, you have a safe hiding-place here, for this mill is mine, and nob dy ever interferes with my right to ke p it secluded to myself.

"I must apologize for having intruded in so unwelcome a fashion. From this moment until I am well enough to crawl away, or until you bid me go, I shall consider myself

your guest. Mandoline gazed rather disconsolately on the comfortless surroundings, and then her glance rested again on the handsome haggard features of the man she was sheltering, she knew

not from what danger. "I am afraid you will find me a neglectful hostess," she said, wishing the while she could gain refuge for him beneath her father's roof. Already you must be fainting for want of food, and I have not yet thought how I can bring you anything. I will go now, the sooner to return, and in the meantime you must lie down and give that poor arm a rest."

A slow flush stole over the pallor of his cheeks.

"I feel that I am exacting too much from you," he muttered, conscious of his obligation to her; "I- who can not even reveal to you my name." "You know mine—that is enough," she answered lightly. "I shall remember you, not as a stranger, but as

one to whom I have promised my truest friendship." The next moment she had disap-

way, and he heard her spring lightly down the ladder and hurry away. "She is an angel," he thought, a great softness coming over his face. smile.

"Fate sent me there to-day," she longing yet not daring again to ask thought, repeating to herself the him to trust her. the words she had uttered to him. "Poor fellow! What a night of agony he so unconscious!"

She hurried through the dairy into on, and the air gets chilly? This poor the kitchen, and astonished the busy roof will scarcely shelter you from the cook by going over to where the shining pots were steaming on the stove, and lifting the lids eagerly one by one. "What have you here, Martha?" she asked almost breathless from her long walk and the excitement of the moment. "Soup! That will do. I must have a big cup of it. Yes; and

some cold chicken and new-laid eggs." "Dinner will be ready in half an hour, Miss Madoline," the woman said, her voice expressing considerable surprise. "Don't you think you may spoil your appetite?"

the things for myself—that is, not to eat now. She stopped suddenly confused.

Had she not nearly betrayed herselfbetrayed the man who could not tell her how much depended on her se-

girl's manner, and smiled meaningly. know what Miss Madoline wants," she said with a good-natured shake of the head; it's for some poor cottager again. I can't say what the sick folks would do without you, I'm sure. There, I'll get a parcel packed nicely for you, and one of the boys can carry it wherever it is required."

"I would rather take it myself," Madoline answered in a faint voice; The fact is-I do not wish any one to know where I am going with it-especially I do not wish my journey known to my father nor to Aunt

It cost Madoline an effort to say this much, and there was such a great earnestness in her manner that Martha was more than willing to fall in with the girls plan.

"She's helping some of the poacher's people," the woman thought, coming to the only conclusion which seemed to call for concealment. Mr. Clyde is so determined in his anger against them, that they'd have to be very near starving before he gave them a crust of bread.

Aloud she said: "Depend upon it, I'll not say a word about it. I'm the last one to stand in the way of your good actions; and when poor folks are in distress, it is not the time to visit their sins

upon them." Madoline was embarrassed to decide how far this speech applied to the present need, but not feeling herself free to make a confidence of Martha, she did not reason out the thought, and contented herself with having so far succeeded.

"I am in a great hurry, Martha, she said, wistfully; you will put the things together quickly, will you not!" "Never fear the woman replied, busying herself already with her task. and Madoline, feeling that her presence might delay the preparations, hurried to her own room, and searched out some strips of old linen-fitter bandages, she thought, than the slender handkerchief with which she

had bound the stranger's arm. When she returned to the kitchen she found the basket neatly packed, and with an earnest "Thank you" to Martha, she took it gratefully, and once more hurried out into the sun-

This time she did not cross the fields to the mill; she was afraid she might be seen on the way by somebody she knew, and be forced to give some account as to her journey.

Madoline wished to avoid all questions to which she dared not give a direct reply; and with this aim in view, she took a narrow path, skirting the woods, and reached her destination unseen.

She found the stranger much as she had left him, and again she was alarmed by his ghastly appearance. "I believe this place will kill him, peared through the low arched door- she thought, the old fear returning to her. "Poor fellow! I wish he would

TTO BE CONTINUED.

FOR THE LADIES.

Gen. Grant's Daughter.

The deep affection called forth by

Gen. Grant's great qualities in the hearts of his countrymen has naturally caused his children to become objects of sincere interest to the American only and idolized daughter has, above all, been regarded with kindly sympathy. I have lately read some interesting particulars respecting Mrs. Sartoris, writes Lucy Hooper to the Philadelphia Telegraph, and I deem it no infringement of her domestic privacy, in view of the unfortunate publicity that her matrimonial affairs (through no fault of her own, most assuredly) have already attained, to give them to widely known, is the courage and done, and become nicely browned. strength of character that Mrs. Sartoris yond all praise. Were she to leave widely reported that she was about to do, he could by the laws of England It was not unnatural that such take from her her children, and Mrs. template for a moment such a contingency. She is much beloved by her father-in-law, who is very fond and who has just been sent to a public which Mr. Sartoris ought to take and which she takes in his stead. Her an added brilliancy; but, handsome, At the gate she paused, and looked admired, and most wofully wedded as she is, no charge, even of coquetry or flirtatiousness, has been brought against her. Such is the true position of a much-talked-about state of affairs.

An Apparition.

The late Mrs. Andrew Joyner, of Halifax, was one of the most intelligent, deeply rious Christian women to be found in any land or age. She was the daughter of the celebrated Wiley Jones, of Halifax town, of revolutionary fame. Mrs. Joyner's first husband was Gov. H. G. Burton, a the house. native of Granville county, but who resided at Rocky Hill, some two or three miles from the hamlet of Ringwood. A long winding hill leads up to the residence, which is pitched on a lofty eminence. Gov. Burton was in western Carolina digging gold. He had been from home several months. His wife and eldest daughter, Mrs. James M. Williams, were in a heavy, "My appetite! Oh, I do not want close carriage returning to Rocky Hill from a visit. Mrs. Burton looked out of the window and to her gratification and surprise, discovered her husband some fifty yards or more distant approaching on horseback. He was clad in his usual farming suit. Mrs. Bsaid to the driver: "Jacob, is not that Martha noticed the change in the your master coming down the hill?" peared in a forthight from the daily administration of ten grains of the went the carriage slowly but no rider appeared. Mrs. B-looked out and failing to see the governor asked Jacob if he saw him. The reply was that he had seen him, but he was gone. Upon reaching the house the anxious wife looked at the clock and noted the time of day and felt assured that evil tidings would come. The mails were slow and it took nearly a fortnight for a letter to reach Halifiax from the county in the mountains. At last a letter came and announced the death of the excellent husband, who had rendered distinguished service to the state. His death had occurred at the precise hour when the wife and servant darts, giving the appearance of a long, saw him plainly with bodily eyes.— Wilmington, (N. C.) Star.

Ocean Robes.

A West Monroe street modiste is just now busily engaged on a lot of bathing robes to be worn at the seaside to and from the water. The garment is cut on the plan of an opera robe with long, easy sleeves and a hooded collar, and finished with ribbon strings that tie at the neck and belt. The goods is usually a Turkish cloth of white or ecru ground with brick-red stripes, but pongee silks faced with bretelles or a Fedora front of gay wash silk are ordered by patrons of fastidious taste. This wrap is carried by the friends or servant attending the fair diver. The moment she leaves the water it is thrown about her and tied at the neck and waist so that her retreat to the hotel or bath-house is pleasing and modest. Those who prefer a heavier wrap use pressed flannel of pink and white or pink and blue blocks. Made like a newmarket, and worn with a hat and rubber or cork bathing-slippers a girl can very comfortably walk along the beach and select her own party without being driven into a boisterous group in order to escape the jeering crowd on the

Queen Victoria's Needle.

A remarkable needle is owned by Queen Victoria. Indeed, it is likely that there is no other needle so wonderful in the whole world. It represents the column of Trajan in minature. This Roman column is adorned with many scenes in sculpture which tell of the heroic deeds of the Emperor Trajan. On the little needle are pic- practice. tured scenes from the life of Queen Victoria, but the pictures are so small that it is necessary to use a magnifying glass in order to see them. The needle can be opened. It contains a number of needles of smaller size, with trimming lace. which also contain microscopic pictures.

Roses in Dry Soil.

Good rose blooms can hardly be obtained in light dry soils without very special attention as to culture in summer. The beds ought to have a good coating of manure laid on the surface around the plants to prevent excessive evaporation. This in gardening phraseology is called a mulch, and is table at home with colored skirts.

beneficial as a nutrient as well as a preventive of the effects of drouth. Water should be given liberally in dry weather in all such cases. Insects are always more persistent in their attacks on roses in dry soils than on those in soil of a moist and cool nature; therefore be more assiduous in the use of preventives, the abundant use of the nation. The famous ex-president's syringe with pure water being the

Home Knowledge.

Egg Cheesecakes. - Twelve eggs, boiled hard and rubbed through a sieve (while hot), with half a pound of butter, then add half a bound of loaf sugar, half a pound of currants, and a little nutmeg.

Potato Pone.--Wash, peal, and grate the world. That her marriage has two pounds of potatoes; add four been a most ill-starred one as regards ounces each of sugar and butter (or the character and the habits of her beef dripping) melted, one teaspoon-English husband no one can for one ful each of salt and pepper; mix well instant deny. But what is, I think, together; place it in a baking-dish, less known, and what deserves to be and put it into a brisk oven until it is

To mix table mustard.—Get good has of late years displayed under most trying circumstances. Her marriage you want to use, mix it with lukewas one of passionate affection on her warm water, stir till about the consistside, at least. Her attachment to her ency of thick cream, cover up until ance had influenced all the past years of her young life.

The brief architecture and the warnings of her wanted for the table—then use vinegar to thin it. If this rule is strictly "I do not know what his secret is, family and her friends. She has ac- adhered to, the mustard will never the top.

Rabbit Soup.—Cut one or two rabbits into joints; lay them for an hour into cold water; dry and fry them in butter until about half done, with four or five onions and a middling-sized head of celery cut small; add to this three quarts of cold water, one pound of split peas, some pepper and salt; let it stew gently for four or five hours, then strain and serve it.

French Mashed Potatoes .-- After well boiling some potatoes in their jackets, peel and mash them with a fork; put them into a stew-pan with some butter and salt, moisten them with fresh cream, and let them grow dry while stirring them over fire; add more cream, and so continue for nearly an hour; dish them, and brown them on the top with a salamander. Serve directly.

Dining-room Curtains .- It is sometimes hard to know just what to put at the windows in a dining-room; shades make the room too dark, and much drapery has the same bad effect. For this purpose one satisfactory way is to get two breadths of dotted white muslin for each window, make boxpleats at the top, have the muslin about three-quarters of a yard deep, and let it hang loosely at the bottom. They look very pretty from the street, and there is no objection to them in

To Cure Warts.—It is now fairly established that the common wart, which is so unsightly and often proliferous on the hands and face, can be easily removed by small doses of sulphate magnesia taken internally. M.

Colrat of Lyons has drawn attention to this extraordinary fact. Several children treated with three-grain doses of Epsom salts morning and evening were promptly cured. M. Aubers cites the case of a woman whose face was disfigured by these excrescences, and who was cured in a month by a drachm and a half of magnesia taken daily. Another medical man reports a case of very large warts which disappeared in a fortnight from the daily salts.

Fashion Notes

The opera hat has gone to the limbo of forgotten things. Pointed shoes are utterly tabooed

both by men and women. Rough-and-ready straw hats and bonnets are in high favor.

The old-fashioned sandal is re-established in favor for ladies' wear. Shirred mull muslin bonnets come

up among other summer millinery novelties. Basques remain short, with high

slender waist. There are no velvet panels to be found on the newest dresses. The rich material is still used, however, for collars and plastrons.

The tailors find gilt braid does not tarnish as rapidly as that of silver, and they also commend the copper red braids for seaside dresses.

A comfortable toilet for hot days has the skirt, sleeves, and plastrons of ecru open etamine, striped or plaid, with polonaise of cream veiling.

A novelty in summer dress material is batiste in quaint Japanese designs, like hieroglyphics, in cactus-red on ecru grounds, or in grayish Japanblue on white.

The pompadour designs of flowers in stripes or at intervals over the surface are in great favor for the dark India silk dresses worn in the morning or all day in the country. A new fabric, known as Neapolitan

gauze, has come into the market. One may find it in all the lighter colors-Nile green, salmon, ciel blue, pale lilac, primrose—as you fancy. Silk hats are now as much in favor

in summer as in winter for dressy wear. This is "English." Even the prince of Wales has never been able to popularize the high white hat. Dresses of white wool, India silk, and lace are prepared for the summer sojourn at the watering places, at the

easide and mountains alike, as these fabrics are not injured by dampness. Bright yellow is discovered to be a rarely becoming color for the lining of a black, dark brown, or dark green parasol; but pale blondes had better not attempt to carry the theory into

Black lace dresses are in great favor with the waist and lower skirt made of strips of satin surah alternating with insertions of French lace, and an overskirt drapery of piece lace edged

The Algerian striped shawls are still phia Call. in vogue with their bourette rough threads of fine wool and soft silk, to which are added some tinsel stripes of silver or of gilt on cream white, scar-

let, black, rose, or French blue. Batistes, percales, and linen lawns with fine specks or line stripes of color _blue, scarlet, or lavender—are liked for dressing sacques, which are pretty enough to be worn at the breakfast

Janauschek's Jewels.

Mme. Janauschek is disabled for the stage by a broken hip, poor old lady, so there can be no suspicion of adver tising in a story of her precious stones. She has probably the finest collection possessed by an actress in this country. She keeps them in the commonest kind of a rough wood box. Langtry has an iron casket, covered with gold plush in which she totes around her trophies. Benhardt has a series of leather cases. Davenport has a steel-lined receptacle. But Janauschek dumps hers all together, with an occasional bit of paper wrapped around some particular gem into the old unpainted box that has a wooden handle on top. This is always carried by a dragon of a maid, but dragons are sometimes careless, and once in a Western barn of a station waiting for a train Janauschek strayed out for a paper and the maid wandered off for something else, and when they met in the ladies' room both started aghast, for neither had the precious box, and each had supposed the other was taking care of it. The maid explained in voluble German that it had been left on the

orous search was set up. The railway officials soon learned that a fortune in precious stones was gone and the excitement was intense. The police arrived. Janauschek nervously gave a slender list of the principal gems. She was prostrated with alarm. There were the Nicholas eardrops, worth \$5,000; Anna of Austria's cross, \$2,000; the set of diamonds given by the Emperor Napoleon III., valued at \$4,000. The presents of the Rothschild family alone reached \$5,000, and heathen myself, if you were the missionaries," and he beamed on them Janauschek was young and charming, an Indian Prince in the long ago, when had told his love in a language which both understood. His conversation mounted up fearfully. The anecdote of his affections related in gems was worth

more than \$4,000. The railway men fell over the police in their excitement-but no box. The telegraph was worked for all it was worth. A man in a linen duster, who had sat near them had departed for some interior point. They wired to catch him. Everything was at fever heat, when Dennis, a sort of under porter, whose duty was to keep the waiting-room tidy, arrived from his

supper. 'Pfhat was all this commoshin "Fifty thousand dollars' worth of

While at the Michigan Press Association, at Port Huron, recently, we had the privilege of hearing a paper read by Mrs. M. L. Rayne, Director of the Detroit School of Journalism, an institution established for the especial purpose of fitting young ladies to become journalists, we believe. The title of Mrs. Rayne's paper was "Women in Journalism." It was filled with pretty word pictures, and pertinent and witty illustrations, but entire frankness in the matter compels us to say that Mrs. Rayne's paper left us with more doubts as to the probable success of women in journalism than we had held before we heard it. In the first place it was too long, and other papers on the program for the session in which it was read could not be heard. In this fault Mrs. Rayne practically illustrated the truth of one objection made against the reception of women into new departments of work, that they will not submit to the same discipline as men, but continually take advantage of the deference due them from men. It seemed to us, also, that the advocate for "Women in Journalism" failed to appreciate the fact that the occasion was one in which convincing argument rather than poetical quotations would have better served her purpose. We had read her beautiful sketches in the Detroit papers and were familiar with her talent in the presentation of pathos and sentiment, but what was expected on the occasion referred to was a frank discussion of the subject named from a recognized member of one branch of the profession, together with such information as she had gained in her experience as Director of the journalistic school that would assist in the formation of a tenable opinion in the matter. Such a report Mrs. Rayne failed to give, and although when she had finished her paper, we knew more of Mrs. Rayne's versatility and wit, and had been again reminded of the women who had succeeded in different lines of journalism, most of whom have been many times "written up" in newspapers and magazines, the impression the writer of the paper should have sought to convey, and evidently wished to convey, was not received. We wanted facts and the opinions of an expert; we received fancy and the pretty phrases of a poet.

The Ann Arbor Democrat has been putting on airs lately in the way of headlines. The style and general appearance of a paper affects the eye and mind of its regular readers much the same as does the dress and voice of an intimate acquaintance, and as we grow accustomed to the taste and tone of a friend, so do we become familiar with the typographical style and tone of the newspaper. When, therefore, a heretofore modest and well-behaved paper suddenly affects flaring black headlines, extravagant in style and sensational in tone, as has our esteemed contemporary, the Democrat, we are as much taken by surprise as we would be should a modest acquaintance suddenly appear on the street dressed in a manner to attract curiosity and cause comment. The Democrat has been afflicted with the headline fever only during the past few weeks, however, and it may have been the result of the extremely hot weather, or it may have caught it from the Argus which is similarly afflicted. In either case, we hope to soon be able to announce its

It would be hard to find a more cosmopolitan class of men than they who compose the newspaper fraternity. Notwithstanding all the distinction that worldly possessions, influence, circumstances and appearance may confer upon the favored few, it can be truly said of them, that whenever the plan of Providence and the stipulations and the entire stock of groceries, prothem to come together, "they meet upon a level and they part upon the square." The editor who has a private office and who can only be seen by sending up your card, freely fraternizes S. McMahon, the celebrated rider and with the humble individual who stands proprietor, was formerly a Washtenaw hens at reasonable prices. Call at his at the case and sets his local from his head, and fills his editorial column with by some of the leading acrobats of articles beginning with "The National Knowall says:" The publisher who imperiously demands "subscriptions invariably in advance," and who would scorn to solicit advertising, proudly promenades the streets with the modest manager of a little sheet that requests cordwood and dried apples in exchange for subscriptions and keeps at its head a standing pitiful pleafor its delinquent subscribers to come in and pay up. We were impressed with the truth of these suggestions, through personal observation at the recent meeting of the Michigan Press Association. And we noticed, too, the entire absence of personal vanity from the breasts of the newspaper men. Hine of the Detroit Tribune, who had the appearance of having just stepped from Mabley's fashion plate, handsome and neat but not dudeish, seemed to cleave to Tom Applegate of the Adrian Times, one of the homeliest men we ever met and whose garb was simply such as is required by the statutes of the state, with a seeming soulful sympathy suggestive of Damon and Pythias. Hampton, the eloquent son of Petoskey; Ainger, President of the Association, Adjutant General of the Michigan Militia, editor of the Charlotte Republican, and the Pooh Bah of the Association generally: Kelley, the sweet singer of the Pontiac Bill Poster, all there, in fact, who to fame and fortune were not unknown. shared equally with their unknown brothers of the press the happiness and hospitality of the occasion.

Two boys were once proceeding to settle a difference according to the small boy's code, when one of them suddenly backed away with the protest. "By jocks! I won't fight if you're goin' time. to scratch." Being unable to agree upon terms, the fight was declared off.

The same difficulty attended of the same difficulty attended of the same difficulty attended to agree the The same difficulty attends the Boulanger-Ferry duel.

They sprinkle their lawns in Ann Arbor with bullheads. We sprinkle em with dust. Bullheads are better than dust for lawns.

Poetic justice would seem to demand that the trees and lawns of the people who voted for waterworks should not be burned up just like the others, but poetic justice is not prevailing here very much this summer.

Geo. W. Nellis, the bicycler who passed through here some weeks ago en route from New York to San Francisco, reached "the coast" last week having made an average of fifty miles a day on the whole trip.

The mother of A. J. Sawyer of Ann Arbor died in Chelsea, last week, aged

The school inspectors of the county met yesterday and re-elected M. J. Lehman as a county examiner, who will hold his office until the 23d of next September, when the new law will legislate him out of office. Then the two older members—Geo. S. Wheeler, of Salem, and E. C. Warner, of Ypsilanti, who retain their position-will, with Judge of Probate Harriman, elect a secretary of the board who acts as the executive officer of the board.-

The little boy baby found on Mr. O. B. Bradley's door step, one night last week, is now in the county house, and will be placed in the home of the first charitably inclined and suitable person who will consent to receive it. The dress which the baby had on when found was made of cheap goods, and this fact leads to the conclusion that its mother was not wealthy, whatever may have been her position and rela-

It was announced through the ageney of hand bills that Charles Mosher of Mosherville would make a prohibition address at Good Templars' Hall last Friday evening, but he didn't address. The announcement was insufficient, the weather was too warm, the subject is not an interesting one at the present time, the hall is too near the clouds, and other like causes prevented such an assemblage of the masses as was deemed necessary to justify any oratorical effort from the gentleman from Mosherville.

Bert Gill, eleven-year old son of Peter T. Gill, of Superior, was seriously injured last Tuesday, through the running away of a team he was driving.

The annual meeting of the Michigan Maccabees was held at Grand Rapids Tuesday and Wednesday of this week. Nearly all of the 160 tents of the state were represented. Mr. A. J. Paisley represented Wolverine Tent of this

The funeral of Mr. Keep, one of Salem's old residents, was held at the Peebles church Sunday morning.

Very Funny. "It is better to laugh than be sighing" says the old song, and that such is the opinion entertained by the generality of mankind, the large audiences everywhere attracted to witness that most laughable of comedies, "Skipped by the Light of the Moon," would seem to abundantly prove. "Skipped" will be seen at the Opera House on next Tuesday evening, and our amusement patrons are promised a rare treat in this production, of which the Pittsburgh Leader says: "The strangest, quaintest, oddest, drollest, queerest, funniest, most ludicrous characters, scenes, situations, sayings and doings that the human mind has ever conceived are embodied in this play. Such laughter as it evokes wherever it is produced has never before been heard within the walls of any theatre in this city.

Albert Edwards and Edward Ewing have formed a partnership for the carrying on of a general blacksmithing and repair business, and are located in the old Shipman shop, near the fire engine house, on Huron street. They purpose making horseshoeing a specialty and will promise prompt and satisfactory work in that line. Edwards & Ewing are also sole agents here for the sale of the celebrated Buffalo Coil Spring Carriages, a carriage that needs only to be seen to be appreciated. Give Edwards & Ewing a call if you need any work in their line, and don't fail to examine the Buffalo Carriage before purchasing.

Auction Sale of Farm Property. Mr. W. P. Olcott, who resides onehalf mile west of Stony Creek on the ridge road, having rented his farm will sell at public auction, at one o'clock Wednesday of next week, August 17, two span of work horses, one yearling colt, two good cows, two yearling steers, a number of well bred pigs, together with wagons and other vehicles, reaper, cultivator, plows, Howe's Standard Scales (800 pounds), and a long list of farm machinery and tools, and a quantity of hay. Remember the date, Wednesday, August 17, at one o'clock.

Will be at the Hawkins House on Tuesday, August 16. Hay fever, asthma, dyspepsia, constipation and what comes from it, all cured, no matter how long standing. Hernia (rupture) radically cured, in only one week's time, no matter how long standing. To know how these things are done go and see the man who does these things as well as say them. Piles, fissure, fistula, cured without knife or ligature and

Common Council Proceedings.

REGULAR MEETING MONDAY EVE., Aug. 8, 1887. Mayor presiding.

Roll called; Council all present. Motion of Ald. Deubel that Martin Creme

COMMUNICATIONS.

COMMUNICATIONS.

To the Mayor and Council:

I would respectfully ask that the hall in the engine house be calcimined. The injury done the ceiling by the failing of the bell tower and the wetting of the walls have left it in a very disorderly condition. It will cost only \$12. I have been obliged to send for two pieces of hose to connect the engine with the stand pipe. What we have used for some years has given out, and as it never cost the City anything, I had less hesitation in ordering new, without asking your consent, as its immediate want was absolute and could not be delayed till your honorable body convened.

EDWARD BATWELL,

Chief of Fire Dept.

Referred to Com. on Fire Dept.

MOTIONS AND RESOLUTIONS.

MOTIONS AND RESOLUTIONS.

By Ald. Neat—
Resolved, That the City lease the property of D. L. Quirk located on Forest Avenue for the period of 99 years for the sum of two hundred dollars, and that the Committee on Street Lights be instructed to receive and accept such land for electric plant and a warrant be drawn on City Treasurer for said amount. Ayes, Ald. Boyce, Kirk, Norton, Neat, Follore and Foerster—6, Nays, Ald. Goldsmith loys, DeNike and Deubel—4. Mayor declared the motion lost.

Ald. Kirk moved that the City Attorne ive us his opinion as to whether the Councily a majority vote can lease ground for electrical to the plant. carried.

By Ald Goldsmith—
That the report of the Com. on Streets and Talks relative to building a sluice on the orth side of Congress street from Huron st. o Huron river be adopted and the Marshal be sistructed to build said sluice and the cost of se same be paid from Contingent fund.

Ayes, Ald. Goldsmith, Roys, DeNike, Neat and Deubel—5. Nays, Boyce, Kirk, Norton ollmore, and Foerster—5. On motion of Ald. Kirk, Council adjourned intil next Wednesday night, August 10, 1887. MARTIN CREMER, Acting City Clerk.

CORRECT-Attest: D. L. QUIRK, CHARLES KING, S. H. DODGE,

CTATE OF MICHIGAN, COUNTY OF Washtenaw, ss. At a session of the Probate Court for the County of Washtenaw, holden at the Probate Office in the City of Ann Arbor, on Monday, the eighth day of August, in the year one thousand eight hundred and eighty-seven. Present, William D. Harriman, Judge of Probate. In the matter of the estate of Caroline D. Weed, deceased. On reading and filing the petition, duly verified, of Caroline S. Weed, praying that a certain instrument now on file in this court purporting to be the last will and testament of said deceased, may be appointed executrix thereof. Thereupon it is ordered, that Monday, the fifth day of September next, at ten o'clock in the fornoun be assigned for the hearing of said petition, and that the devisees, legatees, and heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate Office, in the City of Ann Arbor, and show cause, if any there be, why the prayer of the petitioner should not be granted. And it is further ordered, that said petitioner give notice to the persons interested in said estate, of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in The Yesi-Lantian, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing.
